

GLUETEC GROUP

PURE POWER BONDING.

PURYX® ALL 200-10

USER-FRIENDLY UNIVERSAL ADHESIVE
FOR STRUCTURAL BONDING APPLICATIONS

PURYX® ALL 200-10. PURE POWER BONDING.

Patent-pending polyurea structural adhesive developed in the GLUETEC-laboratory

This new adhesive technology is the innovative response to increasing requirements in user safety, performance, and process reliability. PURYX ALL 200-10 is the high-performance, safer alternative to PU or MMA systems: a new structural 1:1 two-component polyurea adhesive without carcinogenic ingredients, particularly low in odor and user-friendly. PURYX delivers high-end performance with significantly improved occupational safety – Pure. Safe. Strong.

High-End performance

- Structural strength and elasticity
- Very high tensile strength and adhesive force
- Suitable for metal, plastics, composites/GRP, wood, stone
- Sandable, paintable, color-stable (gray)
- No read-through of bond lines on thin plastics

Process Reliability & Productivity

- NO isocyanate training obligation for users
- Open time: approx. 10 min, fixture time: approx. 23 min
- High initial tack, fast handling strength
- Paste-like consistency – ideal for vertical & overhead applications
- Complete curing without tacky residues
- Oil- and UV-resistant
- Suitable for indoor and outdoor applications

Fields of Application

- Automotive & vehicle construction
- Caravan & motorhome manufacturing
- Mechanical engineering
- Construction industry, furniture industry
- Marine & shipbuilding
- Electronics & medical technology

- ✓ **Structural bonding**
- ✓ **Lightweight construction**
- ✓ **Plastic-to-metal composites**

Enter the future with next-gen bonding.
